

FTTH solutions for North America

Shaping the always-on networks of tomorrow

COMMScope®

Broadband networks by CommScope

Engineering the future of broadband

Service providers across North America trust CommScope for complete, end-to-end fiber-to-the-home (FTTH) solutions that optimize broadband deployments with reliable quality. Our proven, innovative technologies help deploy faster, simplify management and scale to meet the demands of today's networks, advancing Broadband For Everyone™ solutions. Backed by 50 years of U.S.-based expertise and offering Build America, Buy America (BABA)-compliant products tailored to today's standards, CommScope empowers providers to deliver future-ready networks while maximizing cost efficiency and supporting long-term value.

Service providers are prioritizing solutions that simplify and accelerate fiber deployments in hard-to-reach rural areas. CommScope is meeting this demand with optimized technologies, expert services, and strategic partnerships designed to cut deployment time and costs—making high-speed broadband more accessible to underserved communities.

CommScope's FTTH solutions empower service providers to roll out fiber networks faster and more cost-effectively. Backed by a comprehensive portfolio of lifecycle services, we support every stage of deployment—from design to installation—ensuring reliable, future-ready infrastructure. With the right tools and expertise, providers can deliver high-performance fiber to the home quickly, efficiently, and with long-term value.

We offer solutions for:

1 Central office and headend

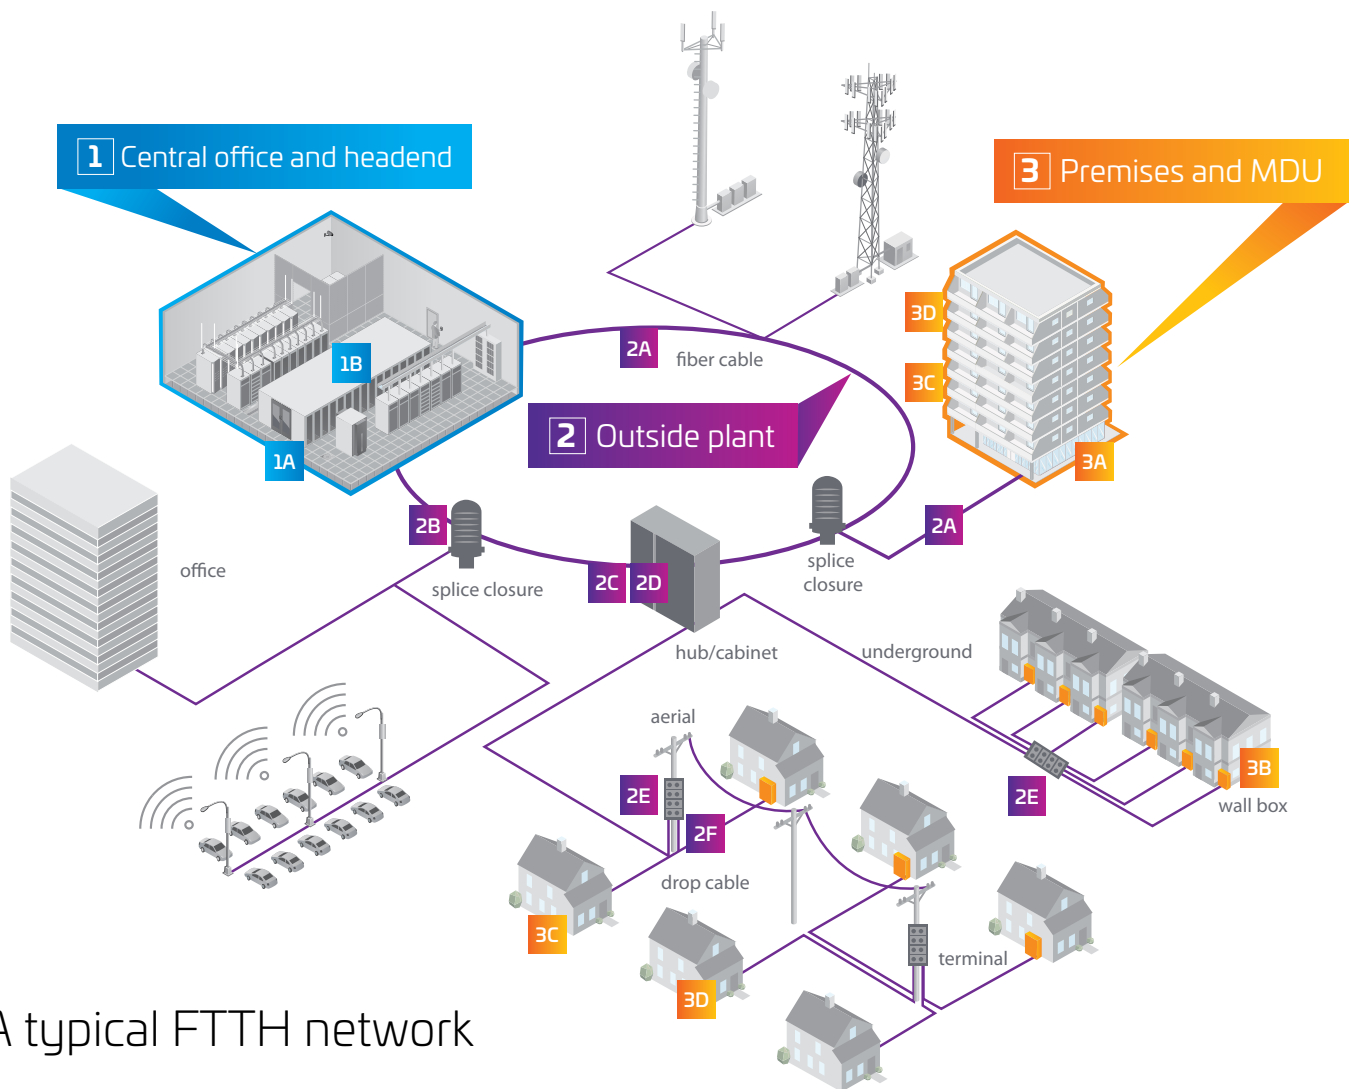

2 Fiber outside plant

3 Premises and multidwelling units

A typical FTTH network

How to Use This Solutions Guide

This guide provides an overview of CommScope's comprehensive end-to-end product portfolio, covering solutions from the central office (CO) or headend all the way to the customer premises.

- **Part Numbers & Catalog Numbers:** The listed numbers represent the most common product configurations. For additional options, please consult the individual product specification sheets.

- **Product Identification:** Products in this guide are marked with either a BABA logo or an Industry Standard logo:

- **BEAD/BABA Compliant:** Suitable for BEAD deployments.

- **Industry Standard:** Appropriate for all non-BEAD deployments.

Quick Links: This guide offers several convenient links to help you quickly navigate to different sections. Clicking a product title will take you directly to CommScope's website, where you can find more details about that item.

What is the Build America, Buy America Act?

The Build America, Buy America Act (BABA) is a key provision of the Infrastructure Investment and Jobs Act of 2021 (Public Law 117-58, §§ 70901-70953). It mandates that all iron, steel, manufactured products, and construction materials used in federally funded infrastructure projects must be produced in the United States. This legislation aims to strengthen domestic manufacturing, support American jobs, and promote long-term economic growth by prioritizing U.S.-made materials in public infrastructure investments.

Key Takeaways

- **BABA Overview:** The Build America, Buy America Act (BABA) mandates the use of U.S.-made materials in federally funded infrastructure projects to boost domestic manufacturing and jobs.
- **CommScope's Compliance:** CommScope offers a broad portfolio of BABA-compliant products, including FTTH solutions and coaxial cables, supporting U.S. broadband expansion.
- **Support for BEAD and Rural Access:** CommScope's solutions align with federal programs like BEAD, helping extend broadband to rural and underserved communities.
- **Waiver Flexibility:** Some CommScope products may qualify for waivers based on availability, cost, or public interest, depending on the funding program.
- **Strategic Manufacturing Expansion:** CommScope has scaled its U.S. manufacturing to meet BABA requirements, reinforcing its commitment to American infrastructure growth.

CommScope's Role in BABA Compliance

CommScope supports the goals of BABA by offering a wide range of products that meet the act's requirements. These include fiber-to-the-home (FTTH) solutions, coaxial cables, and connectivity components that are either fully compliant with BABA or covered under waivers approved by the U.S. Department of Commerce. CommScope has expanded its U.S. manufacturing capabilities to meet the scale and scope of federally funded broadband initiatives, helping service providers deploy high-performance networks across the country.

Application in Federally Funded Broadband Projects

CommScope's BABA-compliant products are particularly relevant for projects funded through programs like the Broadband Equity, Access, and Deployment (BEAD) initiative. These products are designed to support broadband expansion in rural and underserved communities, aligning with the federal goal of achieving universal internet access. The company's solutions span central office infrastructure, outside plant (OSP) systems, and customer premises equipment, offering a comprehensive approach to network deployment.

Waivers and Compliance Considerations

While many CommScope products are fully BABA-compliant, some may be subject to waivers depending on the specific funding program and project requirements. These waivers are granted by the Secretary of Commerce or a designated authority and are typically based on factors such as availability, cost, or public interest. It is important for project stakeholders to review the applicable laws and regulations for their specific funding source to determine compliance obligations.

Conclusion

The Build America, Buy America Act represents a significant shift in federal infrastructure policy, emphasizing domestic sourcing and manufacturing. CommScope plays an active role in supporting this initiative by providing compliant solutions and expanding its U.S. production capabilities. For organizations involved in federally funded broadband projects, understanding and aligning with BABA requirements is essential to project eligibility and success.

Your network architecture is one of your most important decisions

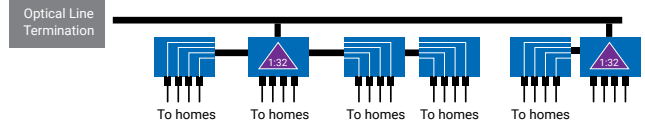

Choosing the right network architecture is essential, not only for financial considerations but also for long-term scalability. This township to rural network comparison guide allows you to explore various network topology options, receive product recommendations, and get comparative cost-of-deployment modeling based on your specific network type. The ultimate objective is to construct cost-efficient, future-proof networks.

1 Central office and headend

The central office and headend is at the forefront of subscriber activation, operations and network integrity.

Today's data-intensive services are bringing the need for ever increasing network speeds and bandwidth capacity in the central office (CO), headend (HE) and data center environment. This is creating the need for more connections between active equipment, and more fiber is being brought in to serve those connections.

For service providers, these higher fiber counts and fiber densities can create challenges at the optical distribution frame, particularly where it comes to ease of access and identification of fibers and connectors. CommScope CO/HE products provide much needed solutions to these challenges.

1A Fiber entrance cabinet (FEC)

The fiber entrance cabinet (FEC) provides splicing, administration and storage for outside plant and intra-facility cables (IFC). The cabinets are designed for deployment in a building equipment area. The FEC offers a cost-effective, space-saving alternative to splicing on the fiber frame.

FEC solutions					Dimensions	Mounting
Catalog Numbers	# of splice drawers	Splice capacity			Dimensions (W x D x H)	Mounting option
		Stranded 2 x 48	Ribbon (flat or RR) 288	Rollable ribbon 432

OSP-CLPFEC-LG

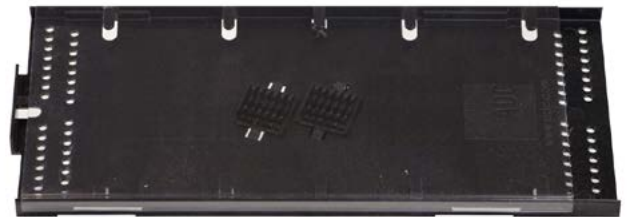

Cable clamping and breakout kits

Catalog numbers	Description	Quantity
	IFC/OSP cable clamp kit for wall mount configurations. Secure three cables to a single cable entry point on the cabinet. Clamp kits can be separated and used as single clamps.	
OSP-CLPFEC-LG	Cables with a maximum diameter of 10 mm (0.4") to 30 mm (1.2")	3
OSP-CLPFEC	Cables with a maximum diameter of 5 mm (0.2") to 18 mm (0.7")	3
	Individual IFC/OSP cable clamp for wall mount configurations. Secure one cable to a single cable entry point on the cabinet.	
OSP-CLPSST	Cables with a maximum diameter of 5 mm (0.2") to 18 mm (0.7")	1
	Individual IFC/OSP cable clamp for rack or wall mount configurations. Secure one cable to a single cable entry point on the cabinet.	
FEC-ACCCLMP01	Cables with a maximum diameter of 10 mm (0.4") to 30 mm (1.2")	1
	Individual soft IFC only cable clamp for wall mount configurations. Secure one cable to a single cable entry point on the cabinet.	
OSP-CLPSST-IFCL	Cables with a maximum diameter of 20 mm (0.8") to 28 mm (1.1")	1
OSP-CLPSST-IFCS	Cables with a maximum diameter of 5 mm (0.2") to 18 mm (0.7")	1
	Secure one cable to a single cable entry point on the cabinet (kit of 6).	
OSP-CLPFEC-XL	Cables with a maximum diameter of 32 mm (1.25") to 38 mm (1.5")	6
OSP-CLPFEC-XL-1	Cables with a maximum diameter of 32 mm (1.25") to 38 mm (1.5")	1

1B CommScope XPND™ fiber platform

The CommScope XPND platform consists of panels, cassettes, modules and cables that work together to support virtually any configuration and application. The panels, cassettes and modules are shipped separately, giving you the freedom to customize and grow quickly and easily. Mix and match cassettes and modules as needed or preserve room for future growth. Minimize SKUs and inventory costs and maximize your network's potential. The CommScope XPND platform continues to evolve, delivering more value year after year.

2 Fiber outside plant

Service providers are expanding fiber networks to power faster broadband for homes, businesses and wireless applications.

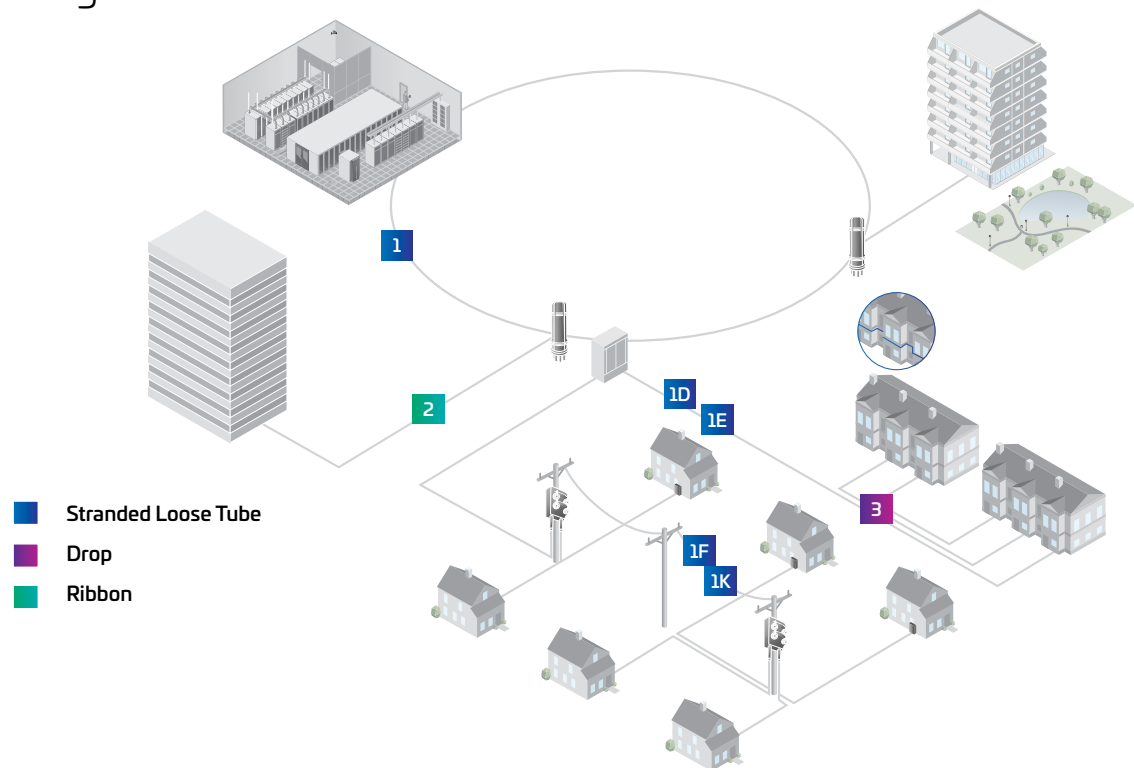

The Outside Plant (OSP) provides critical fiber optic connectivity between the service provider's point of presence (PoP) and subscribers. With a wide range of deployment types, environments, and network architectures to consider, versatility is essential when selecting products for FTTH projects. Enhancing broadband connectivity is key to bridging the digital divide.

CommScope brings decades of proven experience in designing and delivering high-performance OSP solutions that meet the evolving needs of service providers worldwide. Backed by industry-leading technical support and a commitment to quality, CommScope's comprehensive portfolio helps future-proof broadband networks with reliable, scalable fiber connectivity. And, as a leading U.S. manufacturer of broadband connectivity technologies and fiber optic solutions, CommScope is ready to help deliver the quality BABA-compliant solutions you need to expand broadband connectivity into unserved and underserved markets and significantly improve digital equity throughout the U.S.

From fiber optic cables and splice closures that support underground, aerial, and conduit deployment, to fiber access terminals and drop cables tailored for diverse topologies and conditions, CommScope's solutions are engineered for flexibility and durability. Our fiber cabinets and hubs support both rural and urban deployments, accommodating passive technologies with ease.

Every product in CommScope's OSP portfolio is designed to simplify installation, testing, reconfiguration, and service activation—reducing complexity and accelerating time-to-market. With trusted performance and expert support, CommScope empowers service providers to deploy fiber networks that enhance broadband connectivity and help close the digital divide.

Different Fiber Types

CommScope supports several fiber types depending on the specific application. The list below includes popular single mode fibers along with the suggested application.

CommScope Designation	Fiber Grade	SM - MFD @1310nm	Advantages	Suggested Application
8W	G.652.D / G.657.A1	9.2+/- 0.4µm	Most widely used fiber globally, designed to have zero dispersion, operates at 1310nm and 1550nm. Cladding diameter 125.0 ± 0.7 µm	Trunk/Feeder
8F	G.657.A1	8.6µm +/- 0.4µm	Offers optimised bend properties and suited for the LAN networks Cladding diameter 125.0 ± 0.7 µm	Trunk/Feeder
8G	G.657.A2	8.6µm +/- 0.4µm	Higher bend resistance for smaller jointing pits and utilized in advanced cable network installations, Compatible with G.652.D. Cladding diameter 125.0 ± 0.7 µm	Trunk/Feeder/Drop/Dist

Webtrak® and cTrak®

We stand by our performance and provide certified fiber cable test results. Each fiber reel is tested before leaving a CommScope factory. You can view fiber performance test results online with our WebTrak tool. Enter the serial number printed on the cable jacket along with the footage/meter reference to access the data. The WebTrak® tool is available online or cTrak® as a mobile app.

Additionally, you can receive credits toward future cable purchases through our CommScope reel recycling program. In North America, we'll pick up and recycle your used cable reels for FREE.

2B Fiber Closures

FOSC 450

FOSC 450 fiber optic splice closures are a family of closures for use in all outside plant fiber splicing applications. Utilizing compressed gel cable sealing and a quick-release dome-to-base clamp for fast access to the splicing area, there are a variety of sizes to choose from. Each closure is capable of handling a range of cable styles and sizes and incorporates such features as hinging splice trays. FOSC closures are accompanied by a full line of accessories as well.

2B Fiber Closures

FOSC HD

The FOSC HD® closure from CommScope is a high-capacity fiber optic splice closure built in a compact form factor. It helps reduce the number of closures needed per site and fits easily into space-constrained handholes or vaults. Featuring tool-less access, modular trays and broad fiber compatibility, the FOSC HD closure simplifies installation while maintaining the durability and protection found in the trusted FOSC 400/450 platform. The closure is ideal for high-growth broadband deployments in both dense and rural environments.

FOSC HD

MID	Catalog Number	Description
Industry-standard products		
760259591	FOSC-ACC-A-TRAY-SS48-S45	FOSC Tray size A with HD modules, Splice capacity up to 48 single splices (45mm), Includes 2 HD SM24 modules, 48 splice protector sleeves (SMOUV), cable ties and LBT wrap.
760260385	FOSC-ACC-B-TRAY-SS48-S45	FOSC Tray size B with HD modules, Splice capacity up to 48 single splices (45mm), Includes 2 HD SM24 modules, 48 splice protector sleeves (SMOUV), cable ties and LBT wrap.
760260384	FOSC-ACC-C-TRAY-SS72-S45	FOSC Tray size C with HD modules, Splice capacity up to 72 single splices (45mm), Includes 3 HD SM24 modules, 72 splice protector sleeves (SMOUV), cable ties and LBT wrap.
760259392	FOSC-ACC-D-TRAY-SS144-S45	FOSC Tray size D with HD modules, Splice capacity up to 144 single splices (45mm), Includes 6 HD SM24 modules, 144 splice protector sleeves (SMOUV), cables ties and LBT wrap.

867502-000	FOSC600-D8B-NT-0-D4V	FOSC® 600 D fiber optic splice closure, gel cable sealing, butt type, no pre-installed trays, two 4-port gel blocks, 4 ground feedthrough lugs, with test valve

FOSC 650

MID	Catalog Number	Description
BABA/BEAD-compliant		
760256972	FOSC650-N44-NT-0-S12VA	FOSC650 fiber optic splice closure, no tray, includes two 4-port gel sealing blocks, standard basket, 12 grounding lugs and valve

2B Fiber Closures

Fiber repair closures

Gator splice closure is a small butt splice closure primarily designed for splicing two loose tube “flat drop” style cables of 1 to 12 fibers in above grade, below grade, and direct buried applications.

MID	Catalog Number	Description
BABA/BEAD-compliant		
MR3919-000-US	FDSC-GATOR-12F-T	12F splice closure, 10/pk. 7.5" x 5.8" x 1.2"

MR3919-000	FDSC-GATOR-12F-T	12F splice closure, 10/pk. 7.5" x 5.8" x 1.2"

Specialty range closures (SRC)

The specialty range closures (SRCs) are a modern drop solution that's ideal for last-mile fiber network applications—both above and below ground. CommScope's advanced Octopus™ gel seal simplifies access and service and protects the closures from harsh conditions. We've designed the SRCs to be ready for the field and ready for your workforce. They feature factory-installed hinges and a cover that opens from the bottom. The closures are fast and easy to access, thanks to CommScope's Octopus gel seal technology. A lead wire provides security. Octopus protects the SRCs from harsh environmental conditions and is extremely comfortable and resilient, even after numerous closure accesses.

The SRC is offered in two options: Inline Gator (SRC10) and SRC100.

SRC10

[Inline Gator \(SRC10\)](#)

MID	Catalog Number	Description
Industry-standard products		
Configurations—single splice		
SRC9-U5A1F1BN001	SRC9-U5A1F1BN001	Inline Gator, splice only, no adapters, no splitters, 4 splices, SMOUV 45 mm splice protectors, TelSplice connector, black, 2x CR cable retention clip (Round cable: range 4 to 8 mm and flat cable: range 3 x 5 to 4 x 8 mm)
SRC9-U5A1F1BP001	SRC9-U5A1F1BP001	Inline Gator, splice only, no adapters, no splitters, 4 splices, SMOUV 45 mm splice protectors, TelSplice connector, black, tie-wraps and silicon tape (cable range: 2 - 8 mm)
Configurations—ribbon splice		
SRC9-U5A1B1FN001	SRC9-U5A1B1FN001	Inline Gator, splice only, no adapters, no splitters, ribbon (12F) splice holder, TelSplice connector, black, 2x CR cable retention clip (round cable: range 4 to 8 mm and flat cable: range 3 x 5 to 4 x 8 mm)
SRC9-U5A1B1FP001	SRC9-U5A1B1FP001	Inline Gator, splice only, no adapters, no splitters, ribbon (12F) splice holder, TelSplice connector, black, tie-wraps and silicon tape (cable range: 2 - 8 mm)
Super kit		
SRC9-U5A101BN001	SRC9-U5A101BN001	Inline Gator, splice only, no adapters, no splitters, stranded (4F) splice holder, ribbon (12F) splice holder, TelSplice connector, black, 2x CR cable retention clip (round cable: range 4 to 8 mm and flat cable: range 3 x 5 to 4 x 8 mm), tie-wraps and silicon tape (cable range: 2 - 8 mm)
Adapter kit		
SRC9-U3K1F1BN001	SRC9-U3K1F1BN001	Inline Gator, SC/APC adapter, no splitters, 4 splices, SMOUV 45 mm splice protectors, TelSplice connector, black, 2x CR cable retention clip (Round cable: range 4 to 8 mm and flat cable: range 3 x 5 to 4 x 8 mm)
Accessories		
NVX-SRC-CBL-GUIDE	NVX-SRC-CBL-GUIDE	Cable guide for round cables (cable range: 2 - 8 mm) to change the cable orientation from in-line to butt
		

SRC

The Specialty Range Closure (SRC) portfolio provides a modern drop solution that's ideal for last-mile fiber network applications—both above and below ground. CommScope's advanced Octopus™ gel seal simplifies access and service and protects the closures from harsh conditions.

The SRCs are designed to be ready for the field, and ready for your workforce. They feature factory-installed hinges and a cover that opens from the bottom. The closures are fast and easy to access, thanks to CommScope's Octopus™ gel seal technology. A lead wire provides security.

FDH 5000

2D Splitters for FDH 3000 and hub in a pedestal

Plug-and-play splitters are value-added modules that can be placed in an FDH 3000 to implement point-to-multipoint passive optical network (PON) architectures for FTTH networks.

2E Terminals

Innovation meets reliability with our new generation of Hardened Terminals—engineered to empower your fiber network deployments with unmatched speed, flexibility, and durability. Designed for today’s demanding environments, simplifying the installation with plug-and-play reducing deployment time and costs.

Whether you’re expanding urban networks or reaching remote rural communities, our terminals deliver superior performance with a modular, scalable architecture. From single and multifiber distribution to fiber indexing technology and cascaded tap architectures, our product portfolio offers versatile mounting options and cost-optimized solutions tailored to diverse FTTH applications.

Discover how CommScope’s Hardened Terminals can transform your network—maximizing ROI, accelerating deployment, and future-proofing your fiber infrastructure. Let’s build smarter, faster, and stronger networks together.

Hardened terminals				
   				
Hardened Terminals	Technologies available	Small	Medium	Large
HST Series	Multi-fiber stubless. HMFOC input, no splitter. (Requires MHD feeder cable)	2 ports	6 ports	12 ports
		4 ports	8 ports	
	Single fiber stubless, including splitter, Prodigy input (Requires HCA feeder cable)	2 ports, 1x1:2	8 ports, 2x1:4	12 ports, 3x1:4
		4 ports, 1x1:4	8 ports, 1x1:8	
	Multi-fiber: no splitter, cable stub attached	2 & 4 ports	6 & 8 ports	12 ports
	Multi-fiber: no splitter, cable stub attached	2 ports, 1:2	8 ports, 1:8	N/A
		4 ports, 1:4	8 ports, 1:8	N/A
HMT Series	Multi-fiber	Up to 48f	Up to 96f	Up to 24f
		2 ports, each 2, 4, 6, 8, or 12f	6 ports, each 2, 3, or 4f	12 ports, each 2f
		3 ports, each 2, 4, 6, or 8f	8 ports, each 2, 3 or 12f	
		4 ports, each 2, 4, or 6f		
HTT Series	Optical taps	2 drops	4 drops	8 drops
HXT Series	Fiber indexing	12 fiber index only, 1f	12 fiber 1:4	12 fiber 1:8
		12 fiber index only, 2f	12f multi-use 2f + 1:4	12 fiber multi-use, 3f + 1:4
		12 fiber index only, 3f	24f multi-use 2f	12 fiber multi-use, 4f + 1:4
		12 fiber index only, 4f	24f multi-use 3f	12 fiber multi-use, 2f + 1:8
		12 fiber multi-use, 2f	24f multi-use 4f	
		12 fiber branching, 2 to 6f per port		

2E Terminals

As part of our continued effort to simplify product identification and enhance operational efficiency in the field, a color-coded lanyard system has been implemented across our Hardened Terminal (HT) product families—HST, HXT, HTT, and HMT. Each lanyard color and label has been designed to provide quick visual reference for technicians, indicating specific port functions within the terminal.

This standardization improves clarity during installation and maintenance, supporting faster deployment and reducing potential errors in multi-port environments.

For more details on how these ports relate to specific network configurations or for compatibility support, please reach out to our Technical Assistance Center team or your Sales representative.

N		Standard port HST-HXT-HTT
1		First output port splitter HST-HXT
A		Forward feed multifiber HXT
R		Reverse feed HXT
A		TAP input HTT
B		Throughput HTT - single fiber HXT
N		Multifiber HXT-HMT

2E Terminals

Hardened standard terminal (HST)

The hardened standard terminal (HST) represents the next generation of terminals, engineering designed to accommodate a variety of adapters and drop cable applications. Its plug-and-play architecture eliminates the need for splicing, enabling rapid and straightforward installation. All HST's below are BEAD/BABA-compliant.

HST

xxxx = cable length. Standard lengths: 100, 150, 200, 250, 300, 400, 500, 750, 1000 feet. For other lengths please see [ordering guide](#).

2E Terminals

HST Stubless Terminals

HST Stubless Terminals simplify the deployment of both the cabling and terminal while providing the greatest flexibility via plug-n-play hardened connectivity. This enables the ability to change terminal port count and defer the deployment of terminals until required. The stubless terminals support both centralized and cascaded splitter topologies.

Supporting centralized split deployments, HST stubless terminals with HMFOC (hardened multi-fiber optical connector) (pinned) input connector is connected via a cable assembly. The stub end of the cable assembly is spliced and the HMFOC (unpinned) end is connected to the HST terminal. This cable assembly is placed day one, and the terminal can be connected at a later date with the choice of 2, 4, 6, 8, or 12 port terminal. See diagram below.

2E Terminals

HST Stubless Terminals

Supporting cascaded split deployments, HST stubless terminals with Prodigy single-fiber input connector is connected via a cable assembly. The stub end of the single-fiber cable assembly is spliced, and the Prodigy end is connected to the HST terminal. This cable assembly is placed day one, and the terminal can be connected at a later date with the choice of 2-port with 1x2 splitter, 4-port with 1x4 splitter, or 8-port with 1x8 splitter terminals. See diagram below.

2E Terminals

Hardened indexing terminal (HXT)

Featuring innovative fiber indexing technology, the indexing terminal enhances plug-and-play functionality by daisy-chaining up to 12 terminals. This delivers fast deployment, provides greater flexibility, and supports a variety of applications with quick and easy installation—all while improving ROI by reducing costs by up to 70%.

2E Terminals

Mini OTE TAP (optical termination enclosure)

An alternative to centralized and distributed topology is the cascaded tap architecture (below figure), where fiber optic taps are integrated with splitters in a linear, daisy-chain layout. This optical tap design provides a cost-effective solution for rural or low-density FTTH deployments. When paired with optical taps, the mini-OTE 300 lowers deployment costs and strengthens the business case, making it easier to secure funding for projects in rural or sparsely populated areas.

Optical fiber distribution closure series

CommScope offers the industry's most versatile outdoor fiber distribution closure (OFDC) family. Including three different series, the OFDC family accepts a wide range of distribution and drop cables, thus responding to virtually all application requirements. Each series has a common housing that can be configured to handle different connectivity solutions, such as splice-only, pre-connectorized drop cables, and field-installable connectors (FIC)—significantly simplifying training. Modularly built, it allows easy integration of optical components, even at later deployment stages, and easy pass-through cabling. Advanced gel sealing technology ensures fast and easy field handling without a need for special tools. Compatible with all deployment network architectures: centralized, distributed cascaded and TAP applications.

OFDC C12 series—high density

OFDC C12 series

OFDC C12 series

MID	Catalog Number	Description
BABA/BEAD-compliant		
760258540-US	OFDC-C12-NN/00-NN-N-HD-US	High density OFDC C12 fiber optic splice/patch closure, gel sealing, 144 splice capacity, no adapters, no pigtails
760258541-US	OFDC-C12-S2/TT-NN-N-HD-US	High density OFDC C12 fiber optic splice/patch closure, gel sealing, 144 splice capacity, 12 SC/APC adapters and pigtails
760258542-US	OFDC-C12-S2/T0-12-N-HD-US	High density OFDC C12 fiber optic splice/patch closure, gel sealing, 144 splice capacity, 12 SC/APC adapters, 1:2 pre-connectorized splitter
760258543-US	OFDC-C12-S2/T0-14-N-HD-US	High density OFDC C12 fiber optic splice/patch closure, gel sealing, 144 splice capacity, 12 SC/APC adapters, 1:4 pre-connectorized splitter
760258544-US	OFDC-C12-S2/T0-18-N-HD-US	High density OFDC C12 fiber optic splice/patch closure, gel sealing, 144 splice capacity, 12 SC/APC adapters, 1:8 pre-connectorized splitter
760258542-US	OFDC-C12-S2/T0-12-N-HD-US	OFDC C12 fiber optic patch closure, gel cable sealing, 12 SC/APC adapters, no pigtails, 1:2 splitter, no mounting kit
760258543-US	OFDC-C12-S2/T0-14-N-HD-US	OFDC C12 fiber optic patch closure, gel cable sealing, 12 SC/APC adapters, no pigtails, 1:4 splitter, no mounting kit
760258544-US	OFDC-C12-S2/T0-18-N-HD-US	OFDC C12 fiber optic patch closure, gel cable sealing, 12 SC/APC adapters, no pigtails, 1:8 splitter, no mounting kit
760258545-US	OFDC-C12-S2/20-2T05-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 5dB each, no mounting kit
760258546-US	OFDC-C12-S2/20-2T07-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 7dB each, no mounting kit
760258547-US	OFDC-C12-S2/20-2T08-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 8dB each, no mounting kit
760258548-US	OFDC-C12-S2/20-2T10-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 10dB each, no mounting kit
760258549-US	OFDC-C12-S2/20-2T12-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 12dB each, no mounting kit
760258550-US	OFDC-C12-S2/20-2T14-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 14dB each, no mounting kit
760258551-US	OFDC-C12-S2/20-2T15-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 15dB each, no mounting kit
760258552-US	OFDC-C12-S2/20-2T17-N-HD-US	OFDC C12 fiber optic series with rural taps, gel cable sealing, 2 drop taps @ 17dB each, no mounting kit

*Standard OFDC-C12 configurations can be found on [CommScope e-Catalog](#).

Accessories

MID	Catalog Number	Description
EM2200-001	OFDC-C12-BRKSTRAND	Strand mount bracket, set of two hangers. Valid for all OFDC series sizes.
EM0958-001	OFDC-C12-GROUNDKIT	Ground wire for OFDC
760259415	OFDC-GROUNDKIT-BONDCLAMP	Bond clamp for OFDC-C12
760253871	Universal Bracket FTTX	OFDC-C12 universal bracket
CS0940-000	S1515-30X1.5X700-AUTO-N	Gel strip, 1 pc is a roll of 70 cm / 27 inch. MOQ is 4 pc (in a bag). Required for 2 cables per port.
RH0073-000	FOSC-ACC-LBT-WRAP-100	Velcro tape for buffer tube routing
CY3280-000	OFDC-C12-POLE-BRKT-METRIC	OFDC-C12 pole mount bracket kit that attaches to the pole by strapping. **metric hardware**
418289-000	SMOUV-1120-02-PK	SMOUV heat shrink splice protective sleeve 45.00 mm (1.77 in), pack of 100 pcs
760245278	OFDC-B8G POLE MNT BRKT KIT	OFDC-B8G pole mount bracket kit that attaches to the pole by strapping or screwing a lug into a wooden pole. **Metric Hardware**
76024567	OFDC-A4-EXT-SG/44	Extension kit: adapter panel, 4 SC/APC adapters, 4 SC/APC pigtails, 4 SMOUV 45mm splice protectors, 8mm dummy rod
760243998	OFDC-A4-EXT-SG/22	Extension kit: adapter panel, 2 SC/APC adapters, 2 SC/APC pigtails, 2 SMOUV 45mm splice protectors, 8mm dummy rod
760243997	OFDC-A4-EXT-L1/80	Extension kit: adapter panel, 4 LC/UPC adapters

CSC compact splice closures

Designed for FTTX drop applications, CSC compact closures are easily configurable and are available in high volumes to meet demand. From the beginning, CommScope's CSC compact closures were designed for ease of installation and access. And because we began with that goal in mind, your technicians will love the way this totally new component simplifies their fieldwork. Featuring built-in mounting clips and straps, they're easily and quickly mounted on nearly any surface. And to ease installation and maintenance, CommScope's mounting bracket can be used in all applications.

CSC compact closures come with a QR code that allows installers to access CommScope's cTrak® app. With one click, cTrak provides a wealth of product information, specifications, installation instructions, videos, schematics, and test results. CSC compact closures offer an optional customer configurable ID plate to ease network record-keeping.

D68198-000	FIBRBOX-PEDMTGKT-UNIVBP5	Universal pedestal mount for FibrBox

2F Drop cables

HCA drop cables are ruggedly designed and hardened to protect from extreme outside plant temperatures, moisture, and chemicals. Backward-compatible with older generations of hardened and non-hardened connector systems, HCA drop cable integrates seamlessly into existing fiber optic networks. This series offers a large variety of cable types and innovative configurations.

The ultimate plug-and-play solution for durable and reliable service connections

- Technician friendly to greatly simplify installation and maintenance by minimizing splicing
- Cost-effective solutions that contribute to lower overall costs
- Available with one or both ends connectorized
- Available in standard lengths up to 2500 feet
- Available in dielectric and toneable hardened cable

xxxx = cable length. Standard lengths: 100, 150, 200, 250, 300, 400, 500, 750, 1000 feet. For other lengths please see [ordering guide](#).

2F Drop cables

Another innovation in drop cable technology that is changing the outside plant landscape is our MHD multifiber hardened drop cable. This multifiber cable incorporates 12 optical fibers in a single hardened design, and is terminated with a factory-sealed hardened multifiber fiber optic connector (HMFOC). This assembly has a 12-fiber MT (mobile terminated) ferrule enclosed in a water-sealed connector housing for outside plant applications.

- Factory terminated and environmentally sealed for optical drop cable deployments
- Hardened connector technology designed to withstand rugged outside plant environments
- Simplifies installation and maintenance by reducing splicing requirements in the distribution network

Figure 1: HMFOC plug/non-pinned/female

ConQuest® empty conduit

Sometimes conduit needs to be installed ahead of cable, such as in developing neighborhoods or for some long fiber optic cable placements. ConQuest offers a comprehensive portfolio of products that provide a wide range of sizes, wall thicknesses, colors and preinstalled pull lines. CommScope conduit comes with a one-year manufacturer's warranty.

Features and benefits

Feature: High-density polyethylene material

Benefits: Superior resistance to cracking or shattering, providing long-term stability (even at low temperatures)

Provides heavy protection in rocky soil conditions; excellent chemical resistance

Lower coefficient of friction and moisture migration rate than traditional PVC stick pipe

Feature: UV protection

Benefit: Superior protection from cracking during storage

Feature: Continuous length conduit

Benefit: Installs faster than PVC stick pipe; easy to plow; no couplings or glue required

Feature: Conduit

Benefit: Provides excellent cable removal and replacement capabilities

3 Premises, multidwelling units (MDUs) and single-family units (SFUs)

MDUs and SFUs require smart, adaptable fiber solutions and strategies - no matter the property type.

Service providers must deal with complex layouts, architectural obstacles, and local regulations. Access to customer apartments and the telecoms room can sometimes be difficult, so installers need to get the job done quickly. Our innovative solutions help you:

- Deploy fiber throughout the building quickly and efficiently
- Reduce the time needed for service activation
- Ensure high quality and performance despite the high customer churn common in MDUs

A wide variety of distribution hubs are available to fit any kind of MDU or SFU. We also design and manufacture fiber optic wall-mount enclosures and distribution terminals, as well as faceplates and outlets.

3A Premises and MDU

BUDI with FOSC trays

The CommScope BUDI with FOSC trays family is ideal for small to medium-sized buildings. It provides a flexible fiber management system for transitioning outside plant cable to indoor cable via splicing or with connectorized cable assemblies. It incorporates proven fiber routing procedures, cable termination accessories and splice trays—resulting in consistent, high-quality fiber management. Available add-on passive optical modules support the new G/EPON architecture.

Splice-only version

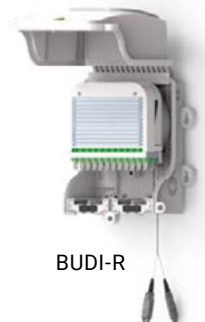

Splice and patch version with SC connectors

760238862	BUDI-1S-12M2-MP12	BUDI-1S, 12 MPO adapters for fiber collection in an MDU

BUDI-R

The BUDI Rapid Fiber® distribution terminal (BUDI-R) is a compact, high-density, fiber box solution designed to speed installation requirements on the customer premises. It leverages the Rapid Reel® fiber cable spool to store and deploy up to 1,000 feet of indoor plenum or I/O riser cable. The multifiber cable terminates to an MPO, HMFOC or connector-less option for fast cable routing and handling by technicians.

3B OWB-S fiber optic wall box

OWB-S provides environmental and mechanical protection for the fiber management system in a small, wall-mountable fiber box. It includes functions for storage, splicing, patching and passive component integration. Designed for wall mount locations, the OWB-S is typically used as a premises connection device in FTTH network, but can also be used in other above-ground applications. A variety of possible configurations are accommodated.

CZ8162-000	OWB-S-S0-S24-0-NN-W	OWB fiber optic wall mount fiber box, 4 SC/APC adapters, fusion splice, no fuse splice protectors, no splitters. MDU option

3C RealFlex® 3 indoor/outdoor cable

RealFlex® 3 drop cables allow for a fiber bend radius as small as 7.5 mm without changing attenuation, and improve insertion loss (IL) performance for 90-degree bends. They are ruggedly designed for maximum flexibility, handling and performance. RealFlex 3 drop cables are available in indoor/outdoor, riser and plenum cable types for use in residential, business and multiple dwelling unit (MDU) structures.

3D Fiber wall outlets

The HFTP-AM wall outlet is a point of termination of the optical connection cable in a residential environment. In its tray it allows to accommodate two or four fusion splices and store their corresponding fibers. The wall plug has two lower entrances, one upper and two rear for the connection cable. The HFTP-AM includes the feature to be mounted on a standard electrical backbox.

The wall plug can be supplied without a cord or connector to be used as a transition box for an external or internal connection cable. Made of self-extinguishing ABS UL V-0 and stainless steel screw.

Engineering the future of broadband

Service providers across North America trust CommScope for complete, end-to-end fiber-to-the-home (FTTH) solutions that optimize broadband deployments with reliable quality. Our proven, innovative technologies help deploy faster, simplify management and scale to meet the demands of modern connectivity, advancing Broadband For Everyone™ solutions. Backed by 50 years of U.S.-based expertise and offering Build America, Buy America (BABA)–compliant products tailored to today’s standards, CommScope empowers providers to deliver future-ready networks while maximizing cost efficiency and supporting long-term value.
