

CableGuide 360™ platform

Today's enterprise networks are edge-based and hyperconnected. Cabling in the backbone network and horizontal sub-systems is densifying—growing more complex and unmanageable. It's all converging on vertical and horizontal cabling managers that weren't designed to handle the strain.

Converging challenges

Today's cable management solutions lack the agility, ease of use and capacity that network managers need to adequately address the constant changes in their vertical and horizontal cabling. This isn't just our opinion. We asked our enterprise customers, and here's what they said they needed from their cable management solution:

- **Simplified and user-friendly:** Easier and faster to deploy, configure, move and manage
- **Increased capacity:** Enable more cabling, cleaner organization and better fiber protection
- **Flexible and future-ready:** Various cabinet and panel sizes, configurations and cable types
- **Globally available:** All SKUs available in all markets, when and where you need them

SYSTIMAX CableGuide 360

The CableGuide 360 portfolio is uniquely designed to address the evolving challenges of today's fiber-dense and fluid cabling infrastructure.

Intuitive design: The CableGuide 360 platform features a streamlined design and simplified operation. Flexible, single-handed door operation, strong but flexible fingers and cable exits that are precisely aligned with rack-mount components help simplify cable management, maintain optimal bend radius and protect your network's ROI.

Highly adaptable: Modular and customizable, the CableGuide 360 portfolio provides a wide range of cabinet and panel sizes, configurations and mounting options. The result is a flexible, future-ready solution that easily adapts to support virtually any application and environment.

Global availability: With CommScope's global production and redundant regional distribution network, all CableGuide 360 solutions are available when and where you need them.

Performance backed up Warranties

At the same time, the CableGuide 360 platform is the only cable management solution that's fully backed by the SYSTIMAX Assurance™ program and the SYSTIMAX 25-Year Warranty. Our Application Assurance Program provides confidence in writing.

CableGuide 360: The difference is in the details

The CableGuide 360 platform features vertical cable managers (VCMs) and horizontal cable managers (HCMs).

Simplified and user-friendly VCMs

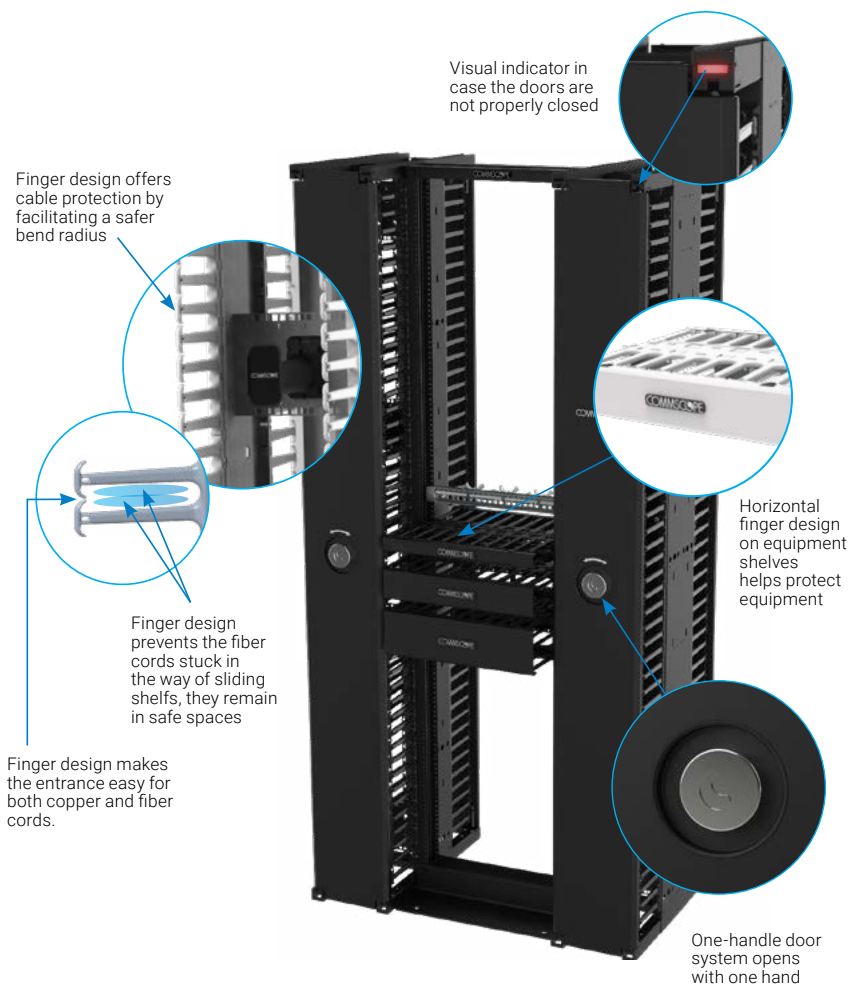

- Patented, one-handed door design
- Patented visual door closed/ajar indicator
- Easy-to-open trough cover
- Quick-release spool can be repositioned
- Fingers align with rack mount units for faster moves/adds/changes
- Supports 19-inch vertical and M2400 horizontal panels
- Strong, lightweight and pre-assembled

Flexible and future-ready

- Zero U capacity VCMs maximize space usage
- 1U, 2U, 3U HCM sizes
- VCMs offer 6-in, 8-in, 10-in and 12-in widths
- VCMs are available in 84-in and 96-in heights
- Black, silver and white color options
- Diverse cable types/dimensions, high-fiber-count assemblies, copper and/or fiber cabling
- Installs onto almost any two- or four-post panel racks

Cable protection, application support

- Strong, pliable fingers enable higher cable densities
- Designed and engineered for cable protection (bend radius)
- Smart routing reduces pinching and crushing
- VCMs offer spools and accessories for excess cabling storage
- Stable, durable build with lighter trough covers
- End-to-end solution that's globally available
- Covered by the SYSTIMAX Assurance Program and 25-Year Warranty

Organize. Manage. Protect. Repeat.

With simplified, user-friendly designs, incredible flexibility and cable protection and application support, one innovative portfolio can organize, manage and protect your vertical and horizontal patching applications. SYSTIMAX CableGuide 360 cable management solutions, from a name you know and trust: CommScope.
