Information unavailable/incomplete	CommScope can track online learning hours by course in its online digital learning platform, THRIVE@CommScope; however, the system doesn't support tracking of overall learning per user. Because of a decentralized and discretionary approach to purchasing learning content by individual businesses, segments and departments, there's no central record for all learning events. Additionally, THRIVE@CommScope doesn't capture instructor-led learning experiences at CommScope. Currently, we don't have a central data-tracking mechanism to report on the learning content usage for our global employee base through those alternative channels.
