

# RUCKUS® ICX 7550

Mid-range enterprise-class stackable access/aggregation switch

## Enterprise stackable switch delivers gigabit, multigigabit and fiber connectivity, to support next generation wireless access

The RUCKUS® ICX 7550 switch delivers the premium performance and scalability required for Wi-Fi 7 deployments and beyond with up to 48 ports of multigigabit connectivity and full 90 watts of 802.3bt PoE power per port with perpetual and fast-boot PoE support. It offers market-leading stacking density with up to 12 switches (up to 576 gigabit, multigigabit or fiber ports) per stack and combines chassis-level performance with “pay as you grow” scalability of a stackable solution. The mid-market stackable switch is one of the first in its class to offer 100 GbE uplinks, enabling enterprises to dramatically increase their network capacity while using their existing optical wire infrastructure.

### Benefits

**Maximum flexibility with gigabit/multigigabit access and 1G/10G aggregation covers a broad range of deployment scenarios**

**Optimized for Wi-Fi 7 deployments and beyond**

- Up to 24x 1/2.5/5/10G Multigigabit Ethernet ports
- Up to 36x 1/2.5G Multigigabit Ethernet ports

**Power next generation PoE devices**

- PoE+/802.3bt 60W/90W per port
- Up to 1900W PoE budget with two power supplies

**40 GbE and 100 GbE uplinks/stacking for maximum performance and future-proofing**

- Up to 2x 100 GbE uplink
- Up to 2x 100 Gbps stacking ports and 1x 100GbE uplink

**Advanced L3 routing delivers design flexibility**

- IPv4 and IPv6
- RIP, BGP, OSPF, VRRP, PIM, PBR, VRF

**Security and data privacy**

- MACsec 128-bit and 256-bit data encryption ensures compliance and data confidentiality

**Broad range of unified management options for maximum flexibility**

- On Premises: SmartZone
- Cloud Based: RUCKUS One
- Controllerless: RUCKUS Unleashed

**Redundant, load-sharing power supplies enhance availability**

The RUCKUS® ICX® 7550 series of mid-range stackable switches are purpose-built to provide wired connectivity at the edge of the network for the latest generation Wi-Fi 6 Access-Points. With high density multigigabit Ethernet ports and the latest 802.11bt 90W PoE power, the ICX 7550 delivers the performance, flexibility, and scalability required for the most demanding campus deployment scenarios.

The ICX 7550 comes in 8 different models that can all be seamlessly stacked together to cover a broad range of deployment scenarios including gigabit or multigigabit network edge and 1/10 gigabit fiber for network aggregation or fiber to the room as well a smart building network edge with a class leading 1900W PoE budget and up to 90W of power delivery per port.

## Multigigabit Network Edge

The RUCKUS ICX 7550 multigigabit models come in 24- and 48-port offering class leading multigigabit port density with a mix of 2.5G and 2.5/5/10G ports delivering the ultimate solution for Wi-Fi 6/7 access points Ethernet connectivity today while providing plenty of future proofing for deploying future generations of Wi-Fi APs.

## Gigabit Ethernet Access

To complete the solution, The ICX 7550 Series includes four Gigabit Ethernet models, two with PoE support and two without. These models come in 24- and 48-port versions and can stack with the rest of the ICX 7550 series to offer traditional Gigabit ethernet connectivity for legacy Wi-Fi access points, VoIP phones, printers, laptop and desktop computers.

## 1/10 GbE Fiber Aggregation

The RUCKUS ICX 7550 fiber models come in 24- and 48-port versions with a mix of 1G and 10G SFP/SFP+ ports offering class leading port density as an entry level 10G aggregation solution

for small to mid-size networks. The 24 ports model offers 24x 10GbE ports while the 48 ports offers 36x 1GbE and 12 10GbE SFP/SFP+ ports. For maximum flexibility at the aggregation layer, the ICX 7550 support a broad range of L2/L3 protocols such as RIP, OSPF and BGP.

## Support for latest generation PoE standards

Latest generation of Wi-Fi access points comes with greater power requirements to support additional IoT radios and scale to a larger number of users. The ICX 7550 Multigigabit models all support 802.3bt with up to 90W power delivery per port as well as a class-leading 1900W PoE budget with two power supplies to maximize the supported number of powered devices. These PoE capabilities make the ICX 7550 ideally suited to provide connectivity and power delivery to the latest generation of smart buildings with PoE powered lighting and LED signage.

## Perpetual PoE and Fastboot PoE

All ICX 7550 PoE models support perpetual and fastboot PoE. Perpetual PoE keeps PoE devices powered without interruption when the switch is restarted, for example after a major SW upgrade or for any other reason. Fastboot PoE delivers power to PoE devices before the switch operating system has completed its boot sequence.

## 100 Gigabit Ethernet support for uplink and stacking

To ensure maximum performance and eliminate any network bottleneck considering the class leading multigigabit and 10GbE port density, the 7550 offers up to 3x100 GbE ethernet ports depending on model. Just like the other members of the ICX switch portfolio, the ICX 7550 can use 2 of these 100 GbE ports for stacking over fiber links and over distance up to 10km to maximize deployment flexibility and simplify switch configuration and management.

# Enterprise-Class Features Across RUCKUS ICX Switches

The RUCKUS ICX switch family delivers the enterprise class features for flexibility, scalability and simplified management.

RUCKUS technology delivers unmatched flexibility, scalability and simplified management for campus network deployments. RUCKUS ICX 7000 switches provide customers the benefits of a traditional chassis, with the flexibility of stackable switches at a dramatically reduced Total Cost of Ownership (TCO).

**Advanced stacking:** goes beyond traditional stacking with capabilities that take flexibility, ease of management and cost effectiveness to the next level, including

- Stacking on standard Ethernet ports
- Long-distance stacking
- No hardware module required for stacking
- In Service Software Upgrade (ISSU) to minimize downtime
- Superior scalability with the industry-leading number of switches per stack
- Stacking at the access, aggregation and core layers

**Enterprise-Class Availability:** improve resiliency and minimize downtime, including:

- Hitless stack failover
- Hot-insertion/removal of stack members
- Redundant power supplies
- In Service Software Upgrades for switch stacks

**Unified wired and wireless network management:** with RUCKUS SmartZone network controller or RUCKUS One:

- Centralizes management of the entire family of RUCKUS switches and wireless Access Points with a single easy to deploy management platform
- Discovers, monitor, and deploys configurations to groups of switches and wireless APs

**Network Automation:** with RUCKUS SmartZone and RUCKUS One delivering capability like zero touch provisioning and automated software upgrade as well as integration with open automation platform like Ansible.

**On-boarding and security policies:** across ICX switches and wireless networks.

OpenFlow 1.3 protocol support in hybrid mode: allows user to deploy traditional Layer 2/3 forwarding with OpenFlow on the same port for Software Defined Network (SDN) enabled programmatic control of the network

**Open Standards based management,** monitoring and authentication

- sFlow-based network monitoring to help analyze traffic statistics and trends on every link and overcome unexpected network congestion
- Open-standards management includes Command Line Interface (CLI), Secure Shell (SSHv2), Secure Copy (SCP), and SNMPv3
- Support for Access Controller Access Control System (TACACS/TACACS+) and RADIUS authentication helps ensure secure operator access
- LLDP and LLDP-MED protocol support for configuring, discovering, and managing network infrastructure such as QoS, security policies, VLAN assignments, PoE power levels, and service priorities

Optics	
<b>See <a href="#">Optics Datasheet</a></b>	RUCKUS offers a unique set of high-performance, reliable, and cost-effective optical transceivers to help enterprises and service providers meet the challenges of diverse network topologies. To ensure maximum quality, RUCKUS selects and tests the most reliable, highest-performing optical transceivers on the market, and then warrants their availability, capacity, and performance in RUCKUS® product." for the specific list of optics supported by each ICX product see the Optics Datasheet at <a href="https://www.ruckusnetworks.com/products/optical-transceivers/">https://www.ruckusnetworks.com/products/optical-transceivers/</a>

Management Software	
<a href="#">SmartZone</a>	SmartZone network controllers simplify network setup and management, enhance security, minimize troubleshooting and ease upgrades for networks built on RUCKUS switches and access points. Whether you're building complex multi-geo networks or delivering multi-tier managed networking services, SmartZone network controllers deliver the scale, flexibility and openness to support the most sophisticated deployment scenarios.
<a href="#">RUCKUS One</a>	RUCKUS One takes the complexity of deploying and managing a distributed network out. It enables faster response to organizational needs while also reducing IT overhead. RUCKUS One eliminates the need to deploy on-premises controllers and management software, moving network management to the cloud. Your multi-site network can be centrally managed through a single pane of glass web-based UI and full-featured mobile app.
<a href="#">Unleashed</a>	Unleashed is a simple-to-setup, easy-to-run management solution in a package designed and priced for small businesses. With builtin controller functionality, there's no need to invest in a separate appliance for Wi-Fi control or in network management software. You can manage your entire network from your phone or web browser including all your APs and switches together.

## Warranty

RUCKUS ICX 7550 Switches are covered by the RUCKUS Assurance Limited Lifetime Warranty. For details, visit [www.ruckuswireless.com/warranty](http://www.ruckuswireless.com/warranty).

## Best-in-class support

RUCKUS ICX 7550 switches come with 90 days of free technical support from the RUCKUS Technical Assistance Center (TAC). For continued access to the TAC past the initial 90 days, customers must purchase a RUCKUS Technical Support contract. For details, visit [support.ruckuswireless.com/programs](http://support.ruckuswireless.com/programs).
