

RUCKUS Unleashed

Designed for Limited-Service Hotels

Today's guest expects seamless, secure Wi-Fi® everywhere—from the lobby to the farthest room—even in limited- and select-service hotels. Travelers prefer a frictionless hospitality experience that relies on a secure network that can accommodate Flawless streaming, easy casting and perfect video calls.

Why RUCKUS Unleashed is ideal for your limited-service hotel

RUCKUS Unleashed™ is a robust, affordable wireless network solution that helps limited-service hoteliers deliver excellent guest experience and manage costs while supporting enterprise-class Wi-Fi with minimal or no IT staff. Used by more than 65,000 small-to-medium businesses, it provides highly dependable, high-performance Wi-Fi that's quick to install and can easily be managed through a smart phone.

Whether you're an extended-stay, limited- or select-service hotel, installing a RUCKUS network offers you a cost-effective way to build secure Wi-Fi that's easy to use, reliable, high performance, and scalable...and doesn't require IT expertise. Here's what RUCKUS offers that competitors can't:

Unmatched Wi-Fi 6 performance

- RUCKUS superior antenna technology offers the best possible connection with every device, delivering better Wi-Fi coverage and reduced RF interference.
- Manage your Wi-Fi from a mobile device or browser with our user-friendly interface.
- RUCKUS access points (APs) are consistently rated as among the best in the industry by independent testers.

Simple setup

- Installing RUCKUS Unleashed is quick and easy—straight from the box—in as little as 5 minutes.
- RUCKUS SmartMesh™ networking allows APs to connect to each other wirelessly, adjusting for congestion, interference, or failed nodes.

Reliable operation

- RUCKUS ChannelFly® dynamic channel management prevents network congestion in real time.
- RUCKUS Unleashed is a self-healing, redundant wireless network with no controller required, while still providing many of the enterprise-class features that traditionally require a RUCKUS WLAN controller.
- Replacement APs will automatically configure and connect to the network.

Affordable pricing

- RUCKUS high-performance Wi-Fi usually costs less than competing products.
- No need for an expensive controller or complex configurations.
- Fewer APs needed creates savings on hardware costs and simplifies network infrastructure.
- Simple network deployment means saving thousands in installation costs.
- Flexible purchase options: Choose from either capital expenditure or a monthly operational expense.

Scalable solution

- Expand your network capacity and coverage as your business or hotel grows with ease.
- When you add new APs, they automatically discover and join the existing network—inheriting settings and participating in load balancing and failover.

How RUCKUS elevates guest connectivity at limited-service hotels

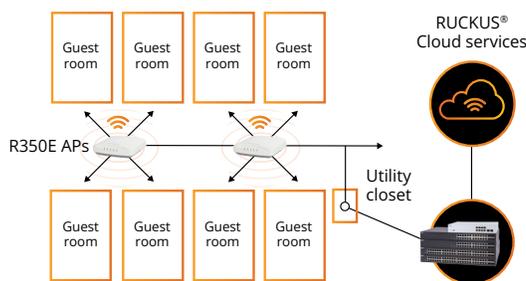

Powerful, purpose-built hospitality Wi-Fi without the headaches—RUCKUS Networks offers an affordable, high-performance solution tailored for properties with limited IT support and modest infrastructure. It's simple to deploy, easy to manage, and delivers the rock-solid performance guests demand.

Here's all you need to deliver robust Wi-Fi throughout your property.

Sample 75-room hotel deployment

- 19 R350e access points
- Two ICX® 8100-24P switches
- Simple to install, onboard, and manage via the Unleashed app

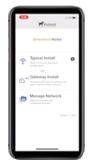

R350e Wi-Fi 6 APs

- Enterprise-grade wireless at an affordable price
- Designed for hotel guest room environments
- Easy to mount; discreet and stylish

ICX 8100 switches

- Scalable, secure wired connectivity
- Power over Ethernet (PoE) for simplified installs
- Cloud-ready with advanced security features

RUCKUS Unleashed app

- No controller needed
- Mobile-first setup and management
- Monitor, manage, and troubleshoot from anywhere
