

Sustainability Accounting Standards Board (SASB) Index

We’ve aligned our report with the Sustainability Accounting Standards Board (SASB) Hardware Disclosure because it closely mirrors our business segments, which include Venue and Campus Networks, Broadband Networks, Outdoor Wireless Networks and Home Networks. We don’t currently disclose all metrics included in this standard, but we’ll continue to evaluate them in the future.

Topic	Accounting Metric	Category and Unit of Measure	Code	2020 Sustainability Report Location	Response/Reasoning for Omission
Disclosures Included in the Hardware Standards					
Product Security	Description of approach to identifying and addressing data security risks in products	Discussion and Analysis—n/a	TC-HW-230a.1	2.2 Leadership and Management: Data Security and Privacy	CommScope’s approach to data security risk is presented in section 2.2 Leadership and Management: Data Security and Privacy, and online at commscope.com—Data Security and Privacy Statement .
Employee Diversity and Inclusion	Percentage of gender and racial/ethnic group representation for (1) management, (2) technical staff, and (3) all other employees	Quantitative—Percentage (%)	TC-HW-330a.1	4.6 Employee Diversity	CommScope doesn’t currently have the global data available to disclose a percentage for racial/ethnic group representation as defined by this metric; however, all information on gender representation can be found in the 2022 Sustainability Report appendices.
Product Life-cycle Management	Percentage of products by revenue that contain IEC 62474 declarable substances	Quantitative—Percentage (%)	TC-HW-410a.1	4.3 Reducing the Environmental Impact of Our Raw Materials, Waste and Water: Product Compliance and Hazardous Substances	CommScope tracks RoHS/REACH substances—for legacy CommScope, 13.7% of EU-sold products in the last two years have REACH substances. 25.5% of EU-sold products in the last two years have RoHS substances; however, all these are under RoHS exemptions. Most legacy ARRIS products use lead (an IEC substance) that is exempted in certain applications and certain alloys. CommScope doesn’t currently have the data available to calculate the percentage of revenue from electrical, electronic and related technology products sold that contain a declarable substance(s). We describe our approach to managing the use of substances that appear as declarable substance groups or declarable substances in IEC 62474 in our Sustainability Report.
	Percentage of eligible products, by revenue, meeting the requirements for EPEAT registration or equivalent	Quantitative—Percentage (%)	TC-HW-410a.2	4.3 Reducing the Environmental Impact of Our Raw Materials, Waste and Water: Product Compliance and Hazardous Substances	CommScope isn’t aware of any of our products that fall within the scope of EPEAT or equivalent registration.
	Percentage of eligible products, by revenue, meeting ENERGY STAR® criteria	Quantitative—Percentage (%)	TC-HW-410a.3	4.2 Climate Change, Energy Efficiency and GHG Emissions	Compliance is dependent on customer (i.e., service provider) Energy Star partnerships. Applicable CommScope products are designed to comply with the industry-led energy efficiency voluntary agreement for the region they are sold into. In 2021, more than 97% of applicable Home Network business unit product shipments complied with the relevant U.S., Canadian or EU set-top boxes (STB) or small network equipment (SNE) energy efficiency voluntary agreement—exceeding our 90% target. Our Access Networks and Edge products continue to align with the objectives of the Society of Cable Telecommunication Engineers (SCTE) Energy 2021 goals to achieve greater energy reductions.
	Weight of end-of-life products and e-waste recovered, percentage recycled	Quantitative—Metric tons (t), Percentage (%)	TC-HW-410a.4	4.3 Reducing the Environmental Impact of Our Materials, Waste and Water	CommScope implements resource efficiency measures to reduce SUP in our products. CommScope continues developing an approach to calculate a complete measure for end-of-life waste companywide. In 2021, CommScope generated 464.19 metric tons of electronic waste.

Topic	Accounting Metric	Category and Unit of Measure	Code	2020 Sustainability Report Location	Response/Reasoning for Omission
Disclosures Included in the Hardware Standards					
Supply Chain Management	Percentage of Tier 1 supplier facilities audited in the RBA Validated Audit Process (VAP) or equivalent, by (a) all facilities and (b) high-risk facilities	Quantitative—Percentage (%)	TC-HW-430a.1	2.3 Supplier Responsibility; and A.5.1 Screening New Suppliers and Identifying Significant Risk for Incidents of Forced or Compulsory Labor	CommScope conducted 268 sustainability assessments and audits in our supply chain. a) 25% of major suppliers completed an audit in 2021, and 55% of major suppliers completed an audit in the past three years. b) 100% (12 facilities) of high-risk suppliers completed an audit in 2021. Suppliers completed these audits using the RBA Code of Conduct and CommScope’s own audit program, which is based on standards such as the ILO International Labor Standards, ISO14001, ISO45001 and the Universal Declaration of Human Rights.
	Tier 1 suppliers’ (1) nonconformance rate with the RBA Validated Audit Process (VAP) or equivalent, and (2) associated corrective action rate for (a) priority nonconformances, and (b) other nonconformances	Quantitative—Rate	TC-HW-430a.2	2.3 Supplier Responsibility; and A.5.1 Screening New Suppliers and Identifying Significant Risk for Incidents of Forced or Compulsory Labor	1) 50% (RBA only) 2a) 0.58 (RBA only) 2b) 8.3 (RBA only)
Materials Sourcing	Description of the management of risks associated with the use of critical materials	Discussion and Analysis—n/a	TC-HW-440a.1	2.3 Supplier Responsibility: Supply Chain Controls; and 2.3 Supplier Responsibility: Conflict Minerals	CommScope complies with the Conflict Minerals provisions in the U.S. Dodd-Frank Act and is committed to eliminating all irresponsibly sourced 3TGs (tin, tantalum, tungsten and gold) Conflict Minerals from our products. CommScope is a participating member of the Responsible Minerals Initiative (RMI). A description of the risks associated with the use of critical materials is available in CommScope’s 2021 Annual Report (10-K) and 2022 Sustainability Report .

Activity Metric	Category and Unit of Measure	Code	
Number of units produced by product category	Quantitative—number	TC-HW-000.A	Communications Equipment: 5.4 billion units Consumer Electronics: 19 million units Other Hardware: 2.6 million units Communications equipment includes invoiced quantity with mixed units of measure, e.g., pieces, length or weight of products. Consumer electronics includes our global CPE products. Other hardware includes head-end and access network equipment.
Area of manufacturing facilities	Quantitative—square feet (ft2)	TC-HW-000.B	4,977,005 square feet
Percentage of production from owned facilities	Quantitative—percentage (%)	TC-HW-000.C	53% for the combined Company between Jan. 1, 2021, and Dec. 31, 2021.
