

SYSTIMAX®
COMMSCOPE

REIMAGINE THE POSSIBILITIES

Endless Innovation

YOUR NETWORK
YOUR FUTURE

The new realities of enterprise networks

Across the enterprise network, AI workloads are intensifying, device connectivity is moving to the edge, and cabling complexity is increasing. The accelerating changes are forcing network and facility managers to rethink their physical layer infrastructure—from the architecture and performance requirements to speed of deployment and the ability to adapt and scale in real time.

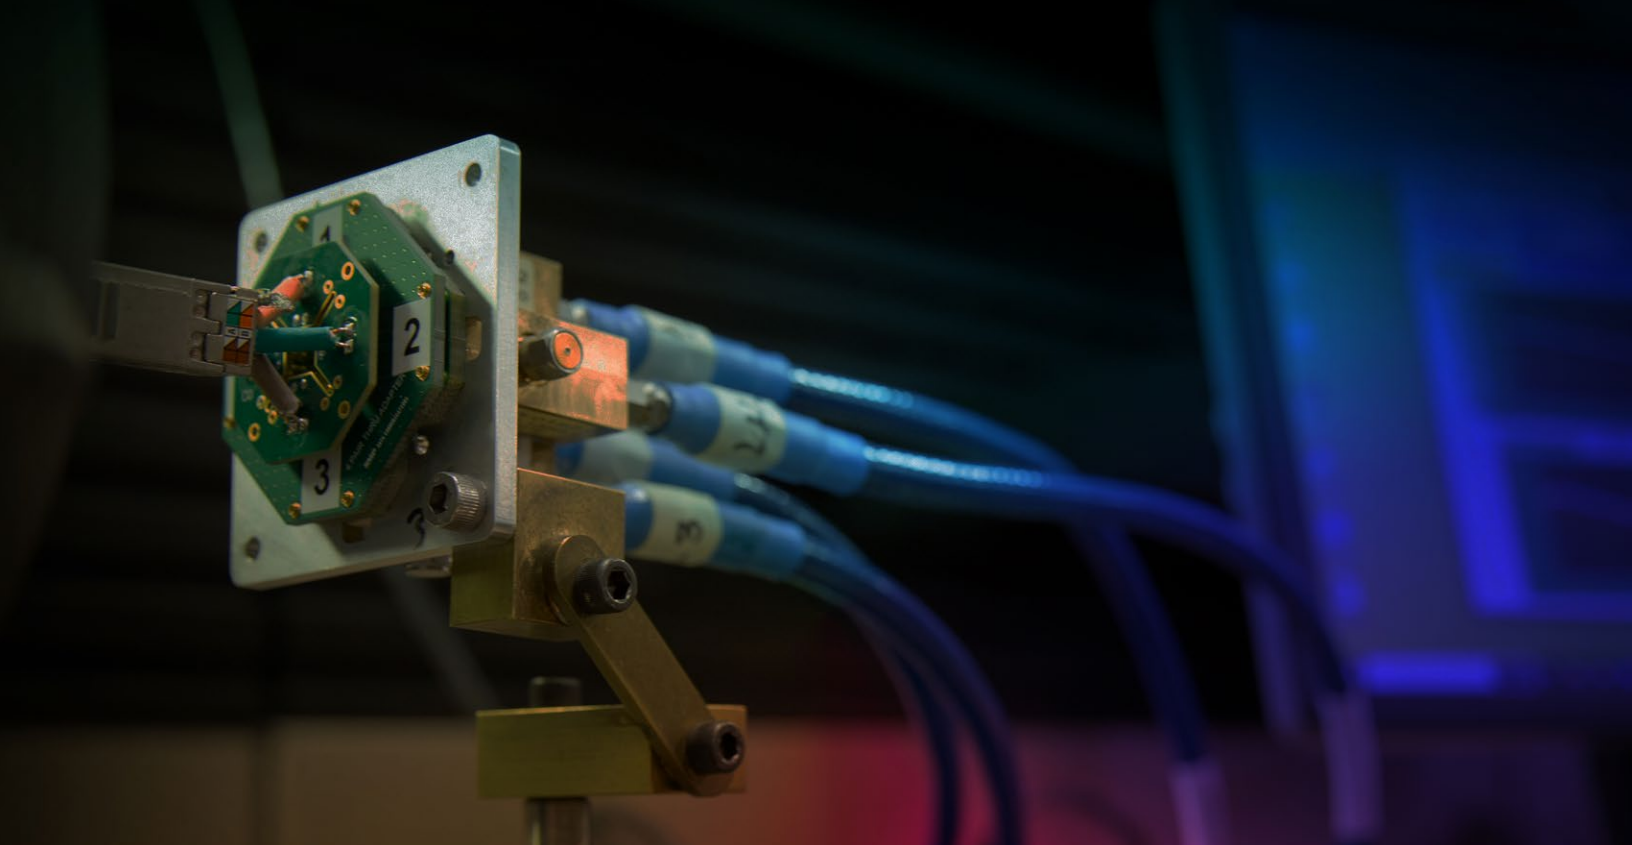

These are just some of the new realities for today's building, data center and connected campus networks. They're not new to CommScope.

We saw them coming and have been working to provide you the innovative solutions and services to respond; agile and sustainable solutions that support ongoing network upgrades; performance that goes beyond the standards; and 360-degree support that gives network and facility managers the peace of mind to evolve with confidence.

Our commitment to innovation, excellence and customer success is exemplified by our SYSTIMAX solutions. Since 1985, SYSTIMAX infrastructure solutions have set the standard or unmatched reliability, performance and innovation. Today, 70% of Fortune 100 companies rely on SYSTIMAX solutions to power their networks the world over. And we're just getting started.

Welcome to SYSTIMAX 2.0 solutions.

Conceived and built with our customers' needs in mind, SYSTIMAX 2.0 is the next generation of the industry's most iconic brand. It features an expanding portfolio of copper and fiber platforms and cable management systems, extended-reach technologies and network intelligence solutions. Behind it all is a radical commitment to surround the customer with a blanket of proactive support, performance assurance and dependability. That's SYSTIMAX 2.0. What our customers need and the industry expects.

A passion for excellence

The SYSTIMAX 2.0 portfolio is driven by four passions, deeply embedded in the brand's DNA:

Relentless innovation

The relentless pursuit of barrier-breaking, standard-shattering solutions that address customers' key issues and empower them to create meaningful change.

Standards-defining performance

We are striving to make every SYSTIMAX solution the best-performing option in its class.

360-degree support

More than enabling customer success, we help achieve it with the product assurance and proactive services customers need to keep evolving their networks.

Sustainable networks

We believe in a holistic approach to sustainability—one that begins with intelligent designs that enable customers to do more with less.

They spoke, we listened

For nearly 40 years, our customers have provided the input and inspired us to go above and beyond. So, when we asked them what keeps them awake at night, they spoke and we listened.

Change management

Growing network complexity increases concerns regarding downtime, supply chain health, network planning and more.

-  Deployment speed
-  Shrinking talent pool
-  Reliable, edge-based power
-  Asset intelligence
-  Product availability

Sustainability

Growing network complexity increases concerns regarding downtime, supply chain health, network planning and more.

-  Defer upgrades
-  Avoid "Rip and Replace"
-  Reduce consumables
-  Extend product life cycles
-  Improve reliability

Premium support

To keep up with change, IT teams need experienced blanket support that delivers peace of mind.

-  Assured performance
-  Design/deployment help
-  Proactive assistance
-  Global availability
-  Broad, deep expertise

Future-ready solutions

Nothing reduces the anxieties of change like knowing you can pivot, adapt and advance without disruption.

-  Mature roadmaps
-  Inherent scalability
-  Modular architectures
-  Configurable designs
-  Clear industry vision

Built on a legacy of innovation and performance

The SYSTIMAX 2.0 portfolio is the product of nearly 40 years of constant innovation. In the mid to late '80s, we pioneered the structured cabling industry. Since then, our fiber, copper and network intelligence solutions have been the catalysts that have advanced the industry—rewriting the standards and redefining how building, data center and campus networks connect.

Welcome to SYSTIMAX 2.0

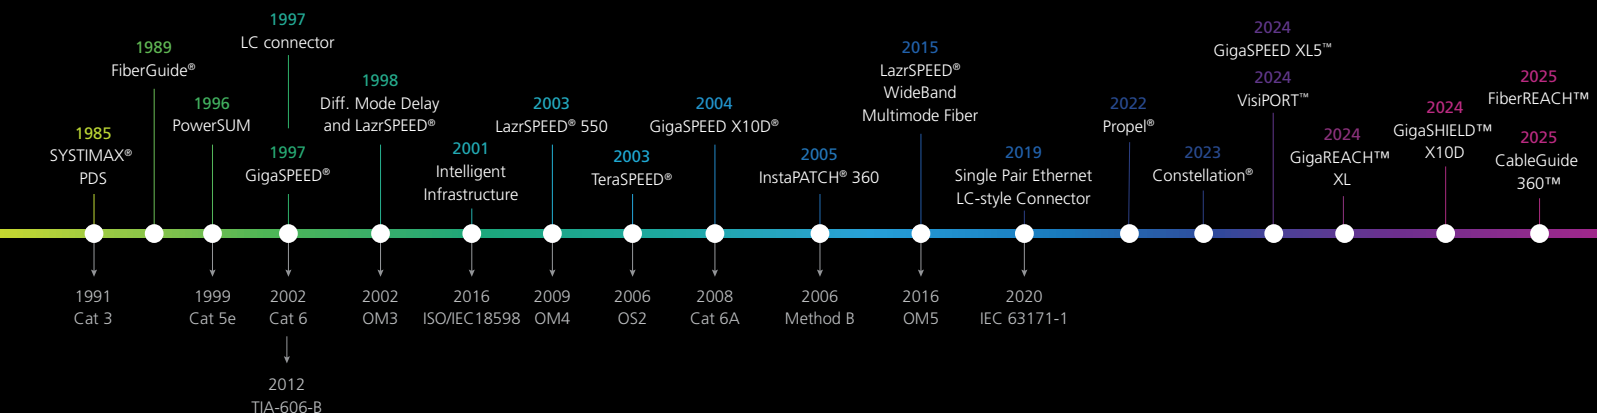

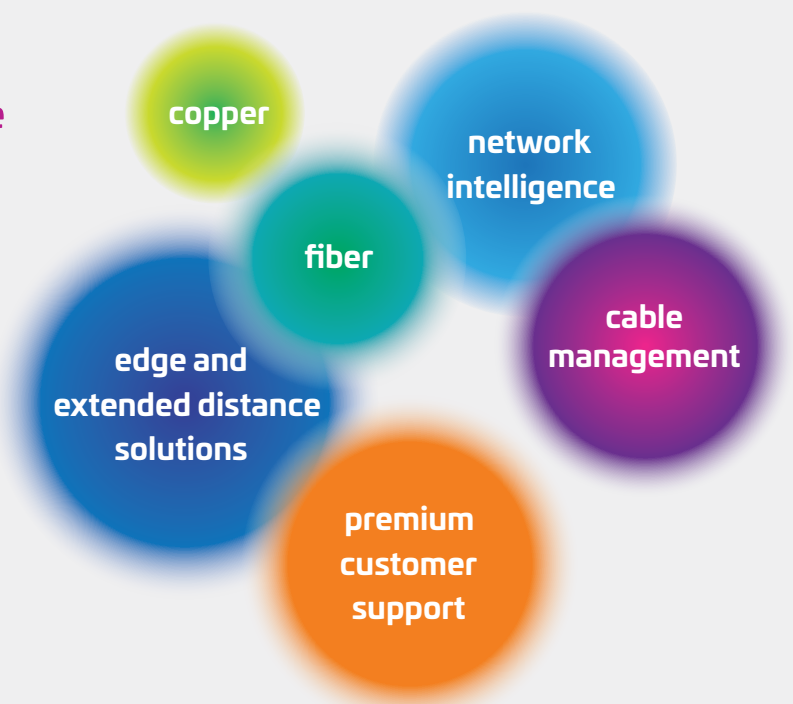

With renewed passion, relentless innovation, and customer commitment, the SYSTIMAX 2.0 portfolio reimagines the possibilities for enterprise networks. The goal? To earn our customers' unequivocal trust that SYSTIMAX solutions will always be there with the ground-breaking solutions, standards-defining

performance and 360-degree support needed to solve any challenge and overcome any obstacle. That's the purpose and vision for SYSTIMAX 2.0 solutions. Re-imagined, re-energized and ready to re-write the rules of enterprise network connectivity.

THE SIX PILLARS OF PERFORMANCE

The new SYSTIMAX portfolio showcases our legacy of performance and our vision of what's next.

It is built on six pillars: copper, fiber, network intelligence, edge and extended distance solutions, cable management and premium customer support. Together, they provide an end-to-end solution for virtually any structured cabling environment, application or challenge.

COPPER

The SYSTIMAX legacy began with the launch of our GigaSPEED® copper portfolio in 1997, which paved the way for Cat 6 Ethernet. Today, that portfolio includes GigaSPEED XL® (Cat 6), GigaSPEED X10D®, and GigaSHIELD™ X10D (Cat 6A), GigaSPEED XL5®, and our newest addition, GigaREACH® XL.

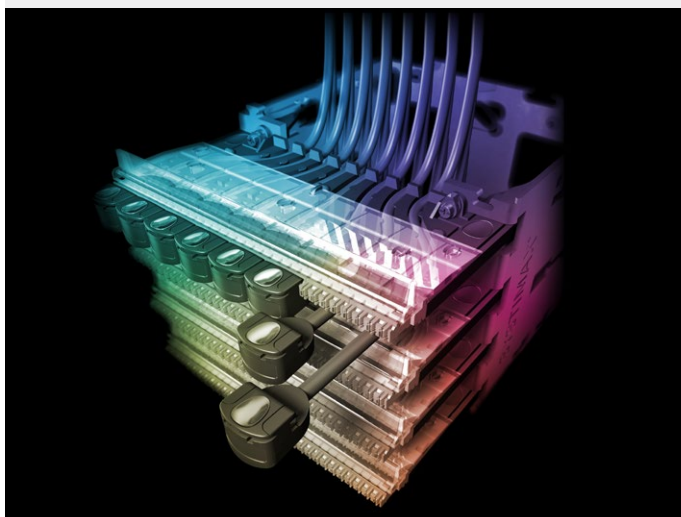

GigaSPEED XL5®

As a premium Cat 6 solution that supports 2.5/5 GbE performance up to 100 meters, the GigaSPEED XL5 solution is in a category by itself. The fully bundled four-connector design is ideal for multigigabit applications like backhaul for next-gen wireless access points. With nearly the same cable diameter as GigaSPEED XL cable, it uses the same installation tools and procedures, extending the value of your Cat 6 investment.

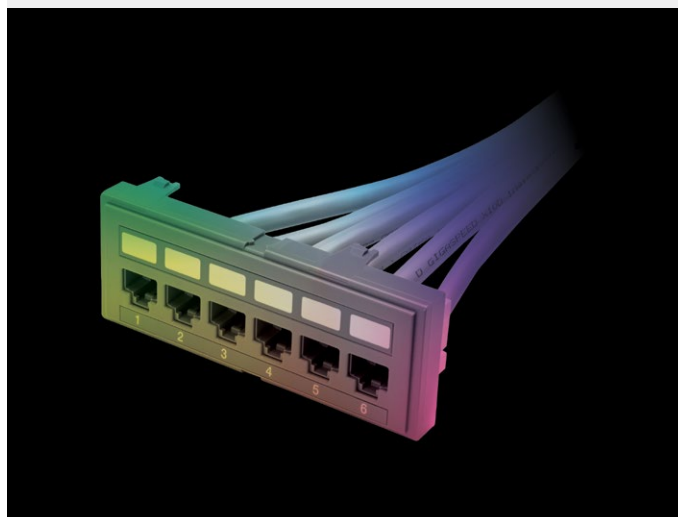

VisiPatch 360®

Combining breakthrough reverse patching with fully integrated cable management, the VisiPatch 360 system projects cords aware from, minimizing congestion and clutter. The result is maximum usable density, lower per-port costs, and unparalleled efficiency that saves you time, space, and money.

InstaPATCH® Cu

Pre-measured and pre-configured, the InstaPATCH® Cu copper patching solution dramatically cuts deployment time, costly rework and skilled labor requirements. Plug-and-play trunk and cable array assemblies arrive ready for deployment to support your most demanding 10G applications.

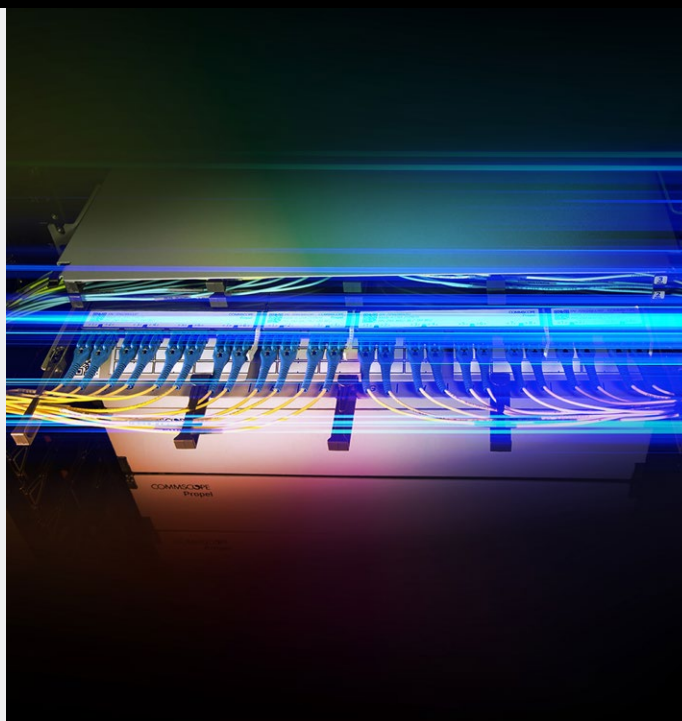

FIBER

The SYSTIMAX fiber portfolio features our groundbreaking LazrSPEED® (OM4/OM5) multimode and TeraSPEED® singlemode families, FiberGuide raceway and high- and ultra-density panels. Each helped redefine the standards. LazrSPEED solution inspired the OM4 and OM5 standards while TeraSPEED solutions paved the way for the OS2 standard.

Propel®

The Propel ultra-low-loss fiber platform is the newest addition to the SYSTIMAX fiber portfolio. It provides the modular agility and simplified management to support on-going network upgrades—400G, 800G, 1T and beyond. With 16-, 8-, 12- and 24-fiber connectivity, the Propel system is ideal for data center and enterprise networks.

NETWORK INTELLIGENCE

Since the introduction of the imVision® platform, SYSTIMAX solutions have been synonymous with network intelligence. The imVision system delivers real-time intelligence and device discovery, allowing you to monitor and document the cabling infrastructure while tracking the location of all connected network devices.

Introducing VisiPORT™

The VisiPORT solution is an easy-to-deploy and easy-to-manage solution that monitors the status and capacity of all copper and fiber ports in real time. Intelligent panels and port sensors automatically detect port activity, alerting users to issues such as insufficient capacity, unauthorized patching, device availability and more.

EDGE/EXTENDED DISTANCE SOLUTIONS

With solutions like powered-fiber cable that delivers high-wattage power and data up to three kilometers away, the SYSTIMAX solution is pioneering new edge-based, extended distance solutions. Now, that effort takes a big leap forward with Constellation®.

Constellation®

The Constellation solution is a high-efficiency, adaptable power/data platform for today's hyperconnected, edge-based enterprise. It combines fault managed power, powered fiber cabling and in-ceiling Constellation Points deployed in a distributed star topology. The result is an altogether unique solution that delivers 10X more power and 5X longer distances than conventional LAN/IP networks.

GigaREACH® XL

The GigaREACH XL platform is the first Cat 6 UTP solution to warranty 100 Mbps/90 W up to 200 m, 1 Gbps/90 W up to 150 meters, and 10 Mbps/90 W up to 250 m—without network modification. Patented twist technology enables a coarser 21 AWG conductor that cuts direct current (DC) resistance per meter in half versus standard Cat 6 cables. Lower loss equals longer distances.

FiberREACH™

The FiberREACH system combines a power supply panel, powered fiber cable and PoE extender to deliver reliable power and data to almost any network device, up to three kilometers from the nearest telecom room. All while simplifying network complexity, reducing costs and maintaining the consistent performance of a standards-compliant link.

CABLE MANAGEMENT

CableGuide 360™

A customizable horizontal and vertical cable management platform with the flexibility and ease of use to manage high-density cable loads. Featuring single-handed door operation as well as, strong, flexible fingers and a wide range of panel mounting options, the CableGuide 360 platform simplifies cable management and maintains optimal bend radius to protect your network's ROI.

PREMIUM CUSTOMER SUPPORT

The SYSTIMAX solution reputation for reliability was founded on our 25-Year Extended Product Warranty and Applications Assurance. It was cemented with services like WebTrak® online performance results, design support and live tech conferences, and more. Now, our SYSTIMAX 2.0 portfolio takes our passion for customer care to a whole new level.

Introducing SYSTIMAX Assurance™

The SYSTIMAX Assurance program is a 360-degree approach to customer care, designed to support you across the entire network life cycle. SYSTIMAX Assurance includes all current SYSTIMAX support—including our 25-Year Extended Warranty and Applications Assurance—and adds on-line training, project installation and onsite design support, 24/7 tech support, monthly newsletters and more. It's blanket protection with unprecedented peace of mind.

CommScope pushes the boundaries of communications technology with game-changing ideas and ground-breaking discoveries that spark profound human achievement.

We collaborate with our customers and partners to design, create and build the world's most advanced networks. It is our passion and commitment to identify the next opportunity and realize a better tomorrow.
